TRAFFIC LID CERTIFICATION

Hill Country Concrete Products, Inc. Certifies that our traffic lids are manufactured to meet or exceed ASHTO H-20 ratings and have been designed by a registered professional engineer licensed to practice in the State of Texas.

Please note that heavy duty doors are intended for “off street” locations that may receive occasional H-20 wheel loads.

If you need a lid capable of bearing more load or one that will be subject to more stress, we will quote the lid built to your specifications.

Quality you can build on since 1978
